# SNIGDHA MOTADAKA

**GOVERNANCE, RISK & COMPLIANCE · AI SYSTEMS ARCHITECTURE · TECHNOLOGY STRATEGY**

motadaka.com · snigdha@motadaka.com · linkedin.com/in/motadaka

## EDUCATION

### Master of Applied Cybersecurity (MACSec)

**Canadian Institute for Cybersecurity at University of New Brunswick**

To Be Class of 2027

### Summer School in Logic and Formal Epistemology

**Carnegie Mellon University (CMU)**

Class of 2020 · Full Merit Scholarship

### Bachelor of Science in Computer Science

**University at Buffalo, SUNY**

Class of 2022

- Summa Cum Laude, 3.83 GPA
- Advanced Honors Scholar
- Phi Beta Kappa, Tau Beta Pi

## SELECTED SYSTEMS

### Kleam.ai

Voice-based input model customization: reads a user's vocal print and tunes model parameters to their sound and tonality, orchestrating multiple AI models behind a single custom response. Entirely front-end/client-side, no voice data stored. Full Stripe subscription flow. Shipped in 2 months.

kleam.ai

### Imageni

Volunteer build for Devipuram, an NGO preserving indigenous sacred knowledge. Media pipeline turning sacred texts into publishable bite-sized social posts, cutting production time over 99%, from a month-long cycle to under an hour.

imageni.replit.app

## ALSO

### Snieaks — Digital Artist

Released across Spotify, Apple Music and YouTube, with a live browser-rendered visual home at **snieaks.com**.

### Breath of the Self — Co-Author

A literary manuscript retelling the Mahābhārata, co-authored with Fable, currently in progress.

## SUMMARY

A rare cross-disciplinary hire at the intersection of Governance, Risk and Compliance (GRC), AI systems architecture, and technology strategy. Combines hands-on regulatory compliance and data governance experience from a Category IV bank with agentic AI system design proven across nonprofit and startup deployments, plus R&D-driven systems architecture sharpened by a market and behavioral-trend analysis edge earned helping build JustShreem, a meditation-app startup, from concept through launch. Functions as both the architect who designs the technical blueprint and the business liaison who aligns contractor and engineering teams around it. Pursuing a Master of Applied Cybersecurity.

## PROFESSIONAL EXPERIENCE

### Data Analyst & Change Champion

Jun 2022 – May 2024

**M&T Bank, Finance** (full-time) — Buffalo, NY

- **Regulatory Data Integrity & Compliance:** Managed source-of-truth regulatory data ingestion for macroeconomic factors feeding Federal Reserve supervisory stress testing at a Category IV institution (over $100B in assets), sustaining 99% data accuracy across stringent audit integrity reviews.
- **Sensitive Data Handling & Process Automation:** Handled Class 5 sensitive data including credit card numbers, spearheading automated testing pipelines that strictly adhered to Federal Reserve compliance and data privacy requirements.
- **Enterprise Integration & Operational Resilience:** Served as Change Champion through the $8.3B People's United Financial acquisition integration, translating executive risk and integration strategy into secure, ground-level operational workflows across thousands of employees.

## Independent Consultant

May 2024 – Present

### Product Design & Technology Strategy

May 2025 – Present

**JustShreem Labs** (meditation app)

- **Market Analysis & Technology R&D:** Conducted market analysis and R&D, as product owner, to identify the best technological route for the startup's conversational AI vision, evaluating 3 vendors (Kommunicate, Crisp, Voiceflow) against a webhook-to-Postgres mirror architecture that keeps the system of record on owned infrastructure, and delivered a phased adoption recommendation.
- **Conversational AI Design:** Designed the conversational AI system end to end, including its agentic flow and the pre-chat workflow that resolves contact identity before a conversation begins, then served as technical liaison with the contractor engineering team that built and shipped it onto the client homepage.
- **Product & UX Ownership:** Owned product design for the consumer mobile app end to end, applying UX and UI principles across user journeys, information architecture and interface design from first architecture decision to live client surface.
- **Security Strategy Advisory:** Advised, based on independent research, on rate limiting and OTP practices for the app's security strategy, informing the contractor engineering team's implementation.

### AI Advisor & Systems Architect

Oct 2025 – Aug 2026

**Billion Readers (BIRD)** (nonprofit)

- **Fundraising & CSR Infrastructure:** Architected the fundraising automation infrastructure for Billion Readers, and facilitated the shared knowledge platform built on it for corporate social responsibility (CSR) fund allocation across a national high-net-worth individual network, convened and hosted at Tech Mahindra, the global IT services firm.
- **AI Quality Assurance:** Designed the agentic workflow system for SRT transcript quality assurance, delivering an 87.5% optimization that took proofreading from 4 hours to 30 minutes for subtitle files delivered to the Indian Institutes of Technology (IITs) nationwide.
- **Cultural Data Stewardship:** Designed the product and the underlying AI system for FirstSongs, a Billion Readers initiative that preserves raw indigenous lullaby recordings, built on Suno inside archival infrastructure designed for long-horizon custody.
- **Organizational AI Adoption:** Led AI upskilling across the organization, running monthly skill-share sessions that established its first AI usage standards, building the internal capability behind its expansion into a contract with Doordarshan, India's national public broadcaster.

### AI Experience Designer
Sep 2025 – Dec 2025

**AIGE Global Advisors** (governance advisory)

- **AI Governance & Auditability:** Built and ran the agentic AI system that processed decades of United Nations audit reports to surface the governing paradigms within them.
- **Executive & Institutional Training:** Supported the CEO in delivering an introductory AI course to United Nations Audit, and in the conceptual design of AI applications for Audit and Investigations teams across UN bodies and for Fortune 1000 boards.
- **AI Ethics & Applied Governance:** Transformed traditional AI governance, AI ethics and applied AI training material into immersive learning experiences, including AI avatar and clone demonstrations built for executive audiences.

### Technology Strategist
May 2025 – Aug 2026

**A Thousand Suns Academy** (education platform)

- **Platform Migration Research:** Led research to inform the decision on which platform to migrate the online education business into, running a four-path vendor evaluation (Skool, ActiveCampaign, n8n integrator models, custom builds) alongside an internal infrastructure audit, and delivering an executive recommendation sized to founder constraints.
- **Architecture & Contractor Liaison:** Designed the platform architecture and served as liaison with the contractor engineering teams building it, coordinating execution against the migration strategy and keeping delivery aligned end to end.
- **Incident Documentation:** Detected and documented an automated form-injection incident, building the record into the evidence base that carried the executive decision to migrate onto hardened infrastructure.

### AI Quality Assurance, Operations
May 2024 – May 2025

**Invisible Technologies** (contract) Remote

- **AI Evaluation & Quality Assurance:** Performed quality assurance of training data for text-to-video models delivered to 2 frontier AI labs, authoring the first evaluation standard for a novel class of model output and stress-testing the pipelines for failure modes and bias.
- **Distributed Team Coaching:** Coached a distributed global trainer team to a 90%+ accuracy rate across 100k+ videos reviewed, annotated and validated.
- **Stakeholder Liaison:** Translated shifting client evaluation criteria into consistent, auditable annotation practice as liaison between client stakeholders and training teams.

## SKILLS & EXPERTISE

**Governance, Risk & Compliance:** Regulatory compliance, audit integrity, data governance and sovereignty, vendor risk evaluation, AI governance policy and evaluation-criteria design, documentation as control, auditable communication channels, privacy-by-design

**AI Systems & Architecture:** Agentic AI system design, conversational AI architecture, requirements R&D, technical specification, migration strategy and vendor evaluation, integrator platform architecture (GoHighLevel, Keap, Memberium, LearnDash)

**Product & Technology Strategy:** Market analysis and technology R&D, product ownership, UX/UI design, information architecture, prompt engineering, organizational AI adoption policy

**Cloud:** S3 management console, Google Cloud agentic AI tools, Firebase app deployment

**Leadership & Liaison:** Stakeholder liaison, contractor and vendor coordination, cross-functional technical translation, distributed team coaching, enterprise change management, Lean methodology
